

# JIC open Forum

## 9. June 2021

### Agenda

Transcending national boundaries and organizations, the Joint Initiative Council’s standards development organizations work collaboratively to provide global, coordinated—not competitive—standards that address real-world healthcare issues. The toolbox for the infrastructure of immunization is available and has been continuously updated to meet the latest requirements. This openForum is providing an insight on the power of standards as providing interoperability and efficiency, even when national or regional implementations seem to be different. Are they really different?

#### Morning Session – Infrastructure to reliably capture and share immunity data / time is now

AEDT 5pm-6:30pm | PST 10pm-11:30pm |
